UNPACKING Y/OUR SUSTAINABILITY POTENTIAL

We designed Pure Collection with sustainability at the heart of the project.

Lightweight product: Pure glass jars and bottles are lightweight compared to similar glass packaging of our catalog. They are designed with an attention to reduce the glass weight and thickness.

Bioplastic: BIOBASED HDPE is a plastic obtained from renewable sources.

Recycled content: PCR-HDPE is a plastic obtained from the packaging that has been used by consumers, properly disposed of, recycled into a new product and put back on the market! Our PCR-HDPE bottles are made of three layers: the inner and outer layers are in HDPE, while the middle one is in PCR-HDPE. PCR-PET is a plastic obtained from the packaging that has been used by consumers, properly disposed of, recycled into a new product and put back on the market!
